Investment management style

The asset mix for each Portfolio Fund is the result of extensive research incorporating investment risk and return relationships and correlation analysis. Portfolio Funds provide diversification among: Asset classes such as stocks, bonds, mortgages and real estate; types of asset classes such as stocks in large, small, or resource-based companies and bonds issued by governments and corporations; assets in different countries such as Canada, the U.S. and other parts of the world; and different investment advisors with different investment styles.

Fund objective

The objective of this Fund is to provide income while also allowing for longer-term capital appreciation. This Fund invests in other London Life funds. It emphasizes income, but provides an opportunity for growth, with lower volatility than the more aggressive profile funds. Its target mix is 60% fixed income and 40% equities.
